Baïi^{••}SB Cut
Flowers

Since 1905 Ball Company has been working to color the world with flowers and since 1992, Ball SB also joined this ideal to Color the World with diversity in cutflowers. Our focus is to work with you to be able to deliver exciting products from our growers to millions of people. But, more than products, we are delivering emotions. Flowers are much more than a plant. They are living organisms reserved and used to express happiness, gratitude, love, excitement. They are present in peoples' most important days and occasions such as weddings, religious ceremonies, festivities, carnivals, love declarations, birthdays and much more. This is because flowers help us express emotions without even saying them, they remind us of the important things in life, they bring joy to people with just looking at them, and they brighten any room. Flowers help us tell stories, they reduce stress levels, they awake most of our senses: sight, smell and touch, and they lift up our moods.

Thank you for helping us to spread emotions around the world,

What are flowers to you?

Juana de la Torre,
CFO

Our Product Categories

TISSUE CULTURE

Tissue Culture is a method in which cells and tissues are propagated in a sterile medium to produce genetically identical plants. This technique is used for various purposes, such as seedling production, vegetative multiplication, virus-free plant production, and hybrid breeding. It offers several advantages, including ease of clone propagation, selection and maintenance of plants, combining multiple genotypes within a single plant, ensuring healthy stock, and creating new plants from unrelated families.

CUTTINGS

Cuttings are asexually propagated plants used for identical genotype plant production. Our highly trained personnel specializes in selecting the highest quality cuttings that yield only the best plants, certified to be free of plagues, virus and pathogens. The advantages of this propagation technique are high-quality materials, homogeneous plant behavior and reduced plant loss during planting. Ball SB can provide either rooted or unrooted cuttings based on customer preference.

SEEDS & PLUGS

Seeds mark the beginning of the journey — wild cells on the verge of creation. Encapsulated within the smallest form is the entire diversity offered by Ball, inspiring beauty and emotions in millions of people and adding color to the world through our genetics.

Plugs/Young plants are grown as individual units in modular trays, enabling minimal root disturbance during planting. These ready-to-plant units have been carefully nurtured through propagation and early growth stages to ensure optimal development.

BULBS

Flowering bulbs can store energy from one growing season to the next. When they begin to grow, they draw on these reserves to produce roots, shoots, leaves, and flowers. This built-in self-sufficiency means they don't need perfect weather or ideal soil conditions—by nature, they already carry everything they need to thrive.

Achillea

Achillea, also known as Yarrow, was named after the ancient Greek hero Achilles. According to legend, Achilles used Yarrow to treat his and his soldier's wounds during the Trojan War. Achillea is a symbol of healing and protection.

SASSY SUMMER

- Natural characteristics that helps them avoid diseases specially those from bugs.
- Only Cut Flower variety.
- Vibrant unique colors.
- Travels well.
- Ideal for indoor and outdoor green house and fields production.

Delphinium

Delphinium, a word derived from the Greek word for “dolphin”, was named after its bloom’s shape which looks like a leaping dolphin when seen from its side. The tall, vertical delphiniums are always aiming high; this is why they are widely associated with success and achievement. One of the only true blue flowers brings us back to the ocean, making them soothing, but also powerful and strong.

SUNSHINE

- Desired variety not only because of strong, tall, sturdy stems and big strong, true blue single florets but also because of its spray habitat and flowers that open all on top – hence, it is a perfect for bouquets.
- A tissue-culture breeding breakthrough, it is highly programmable and provides very uniform blooming.
- A novelty choice for commercial cut-flower growers and consumers – provides a true blue element to flower arrangements.

Product Type: Perennial
Stem Height: 60 cm
Crop Time: 12 weeks from planting to harvest
9-10 weeks from prune to harvest
Planting Density: 10-12 plants/m² net (2-2.25 plants/ft² net)

WALTZ

- The Delphinium Waltz series is the commercial variety known all over due to its full flowered spike with richly true blue colored, shatterless flowers.
- Single flower with strong vibrant blue colors that makes the variety unique.
- This series features tall, strong and sturdy stems with evenly situated flowers.
- Highly programmable when pruned.
- Very versatile plant. You can get very tall thick stems doing stem selection in the field, or thinner and smaller spikes for the bouquet market.

SEA WALTZ

SKY WALTZ

Dusty Miller

Dusty Miller was brought to the cut flower business from the gardens. It is a plant in the family Asteraceae and originates from the Island of Capraia in Italy, where it is called "fiordaliso delle scogliere" meaning cornflower of the cliffs. This bedding plant item has arrived to give our flower arrangements a garden look that is very much in fashion. Its silver color, that complements the pastel colors in the arrangements, symbolizes the moon and is commonly associated with elegance, prestige and wealth.

NEW LOOK

- One of the most productive and unique foliage plants around.
- This special Dusty Miller features tall, thick stems with large, smooth-edged silver leaves.
- The more you pick it, the more stems it produces.
- Ready to cut in just four months from sowing – this hardworking plant will reward you with buckets and buckets of fuzzy silvery foliage all season long.

Product Type: Annual
Stem Height: 60-70 cm
Crop Time: 12 weeks from planting to harvest
Planting Density: 12 plants/m²

SILVER DUST

-

- Silver, serrated, feather-like, velvety leaves.
- Perfect for use as filler or foliage in flower arrangements, separating bright colors or framing showy shrubs like roses.
- Gives enough length to put in flower arrangements when cultivated with the right procedures.

Product Type: Annual
Stem Height: 60-70 cm
Crop Time: 12 weeks from planting to harvest
Planting Density: 12 plants/m²

Echinacea Purpurea

Echinacea Purpurea, also known as coneflowers, originates from the North-East of the US, where the prairies would turn a deep orange in late summer. In natural medicine the plant has proven itself as a medicine for many winter ailments, but we prefer them as cut flowers. Because of such characteristics, these flowers are associated with strength and healing.

DOUBLESCOOP

- Double flower form is eye-catching.

BUBBLE GUM

CRANBERRY

Product Type: Perennial. 1.5 yr plant
Stem Height: 70-80 cms (Bubble Gum)
Crop Time: 18 weeks from planting to harvest
Planting Density: 12 plants/m²

Flowering Kale

From the kitchen to your vase, **Flowering Kales** give a rose-like shape to arrangements. Native to Europe, these cool weather plants grow a mounded rosette with color in their ruffled, feather leaves. It adds a splash of white or red to arrangements along with green accents.

FLARE

- Early maturing.
- In addition to being extremely uniform, it's very easy to get tall stems with this series.
- Flare White is well suited for dying.
- Flare's leaves have a gentle ruffle along their edges adding to their beauty.

WHITE

ROSE

Product Type: Annual
Stem Height: 80-90 cm
Crop Time: 14 weeks from planting to harvest
Planting Density: 80 plants/m²

CRANE

- Flower size is adaptable by adjusting the density and water.
- Tall upright habit with compact shiny leaves.
- Perfect for adding the desired different touch to your bouquets.
- Special Pinch to make them Rositas.
- Crane Ruffle: More vigorous growth habit than the other Crane series.

Product Type: Annual
Stem Height: 70 cm
Crop Time: 12 weeks from planting to harvest
Planting Density: 80 plants/m² net (8 plants/ft² net)

RUFFLE ROSE

CRANE FEATHER

- A different look in Brassicas, this series has very serrated leaves.
- The first uniform feather leaf kale offers two distinct colors, excellent stem length for easy harvest and uniform habit.
- Adds texture and interest to floral arrangements.

new

FEATHER SNOW

KING WHITE

QUEEN RED

Product Type: Annual
Stem Height: 60 cm
Crop Time: 12 weeks from planting to harvest
Planting Density: 80 plants/m² net (8 plants/ft² net)

WHITE LADY

- Flowering Kale White Lady is very versatile focal flower – the green center with darker and shinny leaves provides a great contrast with z flowers.
- Very white leaves with dark green thin line in the rim of the leaves gives this Flowering Kale a unique look.

Product Type: Annual
Stem Height: 62 cm
Crop Time: 12 weeks from planting to harvest
Planting Density: 80 plants/m² net (8 plants/ft² net)

DREAM

- The dark leaves that surround the center area enhance the center color for a great contrast.
- The brightness of the flower color depends on production temperature (lower is better).
- The big advantage of the new Dream series, compared to existing commercial varieties, is that it fixes the color more intensively, and the heads are more compact, giving an overall nicer look.
- Yields a thinner stem, better for shipment.
- Special Pinch to make them Rositas.

Gomphrena

Gomphrena represents love that doesn't fade—perfect for anniversaries, long-distance friendships, or even remembering someone special who's passed. Its long life has made gomphrena a flower of memory and lasting affection. It says, "I'll stick around, no matter what."

QIS CARMINE

- Vivid colour range makes these a Summer-long standout.
- Cut flower suited for greenhouse and outdoor production.
- Suited for fresh and dried usage.

CARMINE

new

Product Type: Annual
Stem Height: 77 cm
Crop Time: 15 weeks from planting to harvest
Planting Density: 21 plants/m²

Gypsophila

Also known as baby's breath, **Gypsophila** was a big trendy flower in the 1990s that has come back in style. Its name comes from the word gypsum, a mineral present in the soil that makes a very heavy and thick ground. Gypsophila symbolizes long lasting or eternal love, and is present in many love binding ceremonies such as weddings and baptisms. The meaning comes from the pure white color of the flower because it can be an eternal flower when used dry. The white tiny flowers also show the purity of emotions that people should have for each other. Following this line, Gypsophila reminds us to stay dedicated to your cause and to remember the power of innocence and purity.

POLAR BEAR

- Large flower: +11mm.
- Intense white.
- Easy to harvest due to its lateral angles.
- Requires less light.
- Weight greater than +38 gr.

new

Product Type: Perennial

Stem Height: 80 cm

Crop Time: 15 - 19 weeks from planting to harvest

Harvest span: 3-4 weeks

From pruning: 15 - 18 weeks

Planting Density: 50.000 plants/ha

MIRABELLA

-

- Favorite medium size flower Gypsophila.
- Similar to the Snowball, Mirabella does not require additional lighting to flower.
- Has an upright plant structure with long internodes to prevent tangling, reducing loss of flowers in packing.
- Very hardy plant low mortality rates.

Product Type: Perennial
Stem Height: 80 cm
From planting to harvest: 20 weeks
From pruning: 18-19 weeks
Harvest span: 3-4 weeks
Planting Density: 6 plants/m² net.

Kalanchoes

Kalanchoes embody resilience and joy, symbolizing beauty that endures and thrives in unexpected places. With their clusters of vibrant blooms, they bring optimism, renewal, and a touch of the extraordinary to any floral design. More than just a flower, they are a celebration of creativity and the lasting power of nature's inspiration.

These Kalanchoes varieties are covered by the following patents: European Patent EP3099165, Canadian Patent CA2936568, Chinese Patent CN106163275B, Japanese Patent JP6301499 and JP6721564B, Russian Patent RU2629222, Turkish Patent TR201708434, United States Patent US10932426, Brazilian Patent BR112016017365. Method for prolonging the longevity of cut flowers: Dutch Patent NL 2012150.

- Premium Quality Slijkerman cut flower.
- Sturdy stems and vibrant, long-lasting blooms.
- Wide Color Range.
- Extended Vase Life.
- Up to 3 weeks with proper care.

CORALITO 20166

Product Type: Annual
Stem Length: 55 - 70 cm (depending on variety)
Crop time: 21 weeks
Planting Density: 55 pl/m²
*Available only in Colombia and Ecuador.

Lilies

Lilies most commonly mean devotion or purity. Because of the Greek myth of Hera and Zeus, lilies are associated with rebirth and motherhood. According to the story, when Zeus wanted baby Hercules to drink the milk from Hera, as she was not the birth mother, she refused. Zeus brought Hercules to Hera to drink her milk while she was sleeping, but she awoke and pushed him away. The drops of milk that spilled on the ground grew into lilies.

LA

- Hybrid between *L. longiflorum* and Asiatic hybrid.
- Upward phasing cup shape flower.

LITOUWEN

YELLOW DIAMOND

EREMOS

ASIATICO

-

- Can reach stem height up to 1.8 m.
- Long, thinner and brilliant petals.
- No fragrance.

BRUNELLO

TRESOR

Limonium

Limonium, comes from the Greek word "meadow" that refers to its original habitat. Limonium originally grew in meadows along the sea in the Mediterranean. This flower brings to our homes the fresh feeling of being warm and relaxed in a breeze meadow in the Mediterranean. Limonium symbolizes remembrance, success, sympathy and beauty.

PERENNIAL SILVER PINK

- This new series is fresh, essential and back in fashion for bouquets, corsages, and flower arrangements.
- The light pink color brings delicacy and elegance to flower arrangement and is very much in style.
- Very productive and hardy plant compared to its competitors.
- The calix and flowers are firmly located in the stems, preventing them from shattering.

SAF Outstanding Varieties Competition 2016
Red Ribbon Limonium Flowers

Product Type: Perennial
Stem Height: 80 cm
Crop Time: 26 weeks from planting to harvest
Planting Density: 6 Plants/m² net (1 plant/ft²)

PERENNIAL SHOOTING STAR

- Limoniums are great fillers for bouquet arrangements. The plant structure create branches that give a lot of volume with just one stem.
- The bright purple color brings life to this plant.
- Very hardy and productive plant that is more resistant to pest and diseases than its competitors.

SAF Outstanding Varieties Competition 2022

Blue Ribbon Other Cut Flowers

Lisianthus

Lisianthus, native to dry areas, also called the “rose of the South”, come from the Texas, North America, however, bouquets containing Lisianthus are not humble at all. This high profile and elegant looking flower requires specific conditions to germinate and grow, but it comes out to be a hardy and strong plant, which symbolizes to rise above your surroundings and to be grateful. Lisianthus is becoming more and more popular due to its beautiful delicate appearance with strong stems and petals.

ABC

- Double flower Lisianthus with high petal counts.
- Uniform plants finish 1 to 2 weeks before competitive varieties and reduce sensitivity to rosetting.
- Plugs finish 1 to 2 weeks faster than comparable varieties and produce uniform crops.
- Lisianthus flowers are not Ethylene sensitive, therefore do not shatter and are easy to ship.
- ABC series comes in types 1, 2 and 3, so its available to grow in different conditions and seasons.

Marigold

Marigold has strong ties to the sun and its power to resurrect. Many considered it a symbol of despair and grief, linking it to the Mexican remembrance of the dead during “Día de Muertos”. It also has a more modern perspective focusing on the sunny colors bringing optimism and success.

COCO

- A vintage, colorful “day of the dead look “, especially trendy after James Bond and Disney Coco movies brought the marvelous festivities into world view.
- Perfect for summer and fall.
- Excellent focal flower due to its flower size and solid strong orange and yellow color.
- Presents a very round flower with a very inconspicuous green center.
- Very versatile flower provides a summer cottage look and offers bright, solid colors.

YELLOW

GOLD

ORANGE

Product Type: Annual
Stem Height: 98 cm
Crop Time: Production starts 11 weeks after planting with peak production in week 12
Planting Density: 80-100 plants/m² net

XOCHI

- Xochi delivers stronger stems and richer colors than other commercial varieties. Xochi means “flower” or “princess of flowers” and is a shortened version of Xochitl, an ancient Aztec word used in Spanish today, most commonly in Mexico. Xochi offers the uniformity, good shipability and durability to meet the increasing consumer demand for Día de los Muertos and Halloween celebrations; good for use in bouquets and grower bunches.
- Stronger peduncles than normal that will permit you to produce bigger heads that won't brake during shipping or when handled.
- Size and color are perfectly stable.

Moluccella

Ironically, this variety that comes from Syria and Turkey, is called **"Bells of Ireland"** because of the vibrant chartreuse-green color of its spikes. Green is the color of the Irish and its also the color of good luck. For the superstitious, it is the flower to have around at home when you need a little bit of extra luck.

MOLUCCELLA / BELLS OF IRELAND

- Lightly scented plant that produces a gorgeous, green bract, which surrounds the rather inconspicuous flowers.
- Molucella is a very versatile commercial flower - the spiky stems make an interesting and long-lasting fresh cutflower arrangement.
- Can be use as a green vertical to give altitude to arrangements.

Product Type: Annual
Stem Height: 38-51 cm
Crop Time: 14 weeks from planting to harvest
Planting Density: 80 plants/m² net (7 plants/ft² net)

Snapdragon

Snapdragon. This mystical flower resembles a Dragon's head when squeezed. As the character it resembles, the snaps are seen as graceful flowers but with inner strength and fire within. It can have two different meanings: graciousness and deception, and sometimes also seen as a charm against falsehood.

MONACO

- The “go-to” snaps for difficult transition harvest periods – late Summer to early Autumn and late Winter to early Spring.
- Monaco tolerates warm Autumn conditions without flowering too quickly, and produces high-quality flower spikes when Autumn weather is unusually cool and dark.
- Performs well all year in areas with moderate temperatures and little daylength fluctuation.

Sunflower

Nothing feels more like summer than **Sunflowers**! Native from North America, the old-time favorite is not only named after, but also resembles the sun. It's no surprise that we see these flowers in paintings by renowned artists from around the world. This flower brings and spreads warmth, happiness, power and strength. Always facing the sun, the sunflower seeks positivity and strength since it is always looking towards the bright side. Its vibrant yellow and orange petals always brighten the mood.

JOE

- New Sunflower for BallSB.
- Tends to open upwards.
- Highly productive: low number of petite flowers.
- Good for open fields production.
- Perfect for Bouquets.

Trachelium

The genus name comes from the Greek word “trachelos” meaning neck. This references the plant’s use in traditional herbal medicine to treat sore throats and other tracheal ailments. This also explains the common name throatwort.

Trachelium plays versatile roles in floral work, working well as a filler in both fresh and dry arrangements. It is especially prized for its interesting texture, umbrella-like shape, full clusters and broad availability in colors. Its flowers also feature a delicate scent, similar to lilac.

Tweedia Caerulea

Tweedia was derived from the sur name of James Tweedie whom by the mid of the 19th century was the head gardener of the Royal Botanic Garden in Edinburg. After he immigrated to South America, he would traveled throughout the continent sending the plants that he found back to Scotland. Tweedia is known for its distinctive turquoise blue star-shaped flowers and greenish felted leaves symbolizing peace and harmony. Its five-petaled flowers bloom in loose clusters, which give way to boat-shaped seedpods.

TWEEDIA CAERULEA

- Another true blue flower.
- Soft velvety leaves.
- Vibrant green stems and leaves that contrast with the vibrant color of the flower.
- Distinctive star-shaped flowers perfect for a bridal bouquet, a grooms' boutonniere or in center pieces.
